No.	SPORTS/2/P	STONE SHIELD FOR PETROL PUMP	Date	FEBRUARY 1955
------------	------------	------------------------------	-------------	---------------

There have been one or two cases reported where the glass petrol pump bowl has been broken by a stone thrown up from the road, where such cars have been used for rally work on particularly bad road surfaces.

The attached illustrations give details for self-manufacture of a stone shield, which can be easily made and fitted.

Owners who contemplate entering the car for rally events would be well advised to fit such a shield and thus eliminate the possibility of trouble in this connection.

NOTE: These instructions are for information only and do not constitute an authority to carry out modifications at the expense of The Standard Motor Company Limited.

2 ILLUSTRATIONS.
