SUBJECT:

THROTTLE ACTIVATED MICRO SWITCH

MODELS:

1977 TR7

At VIN #ACW7477U, a throttle activated micro switch was incorporated on the 1977 TR7.

This component was installed in order to eliminate the air compressor under full acceleration and thereby give better full throttle performance.

This modification was introduced during November of 1976. The part number of the micro switch is UKC-3741.
