WESTERN ZONE

TO: ALL TRIUMPH DEALERS - WESTERN ZONE
DEPT: SERVICE AND PARTS
SUBJECT: SPORTS SIX & SPITFIRE LIGHTING SWITCH

BULLETIN T-63-40

DATE: JUNE 28, 1963

The original switch had 5 wires, 2 of which were coded blue and white which were coupled into a double connector in the main loom.

One of the blue and white wires has been deleted from the current switch, a suitable connection having been made internally.

Both the 4 and 5 wire switches are completely interchangeable and the single blue and white lead on switches so fitted is to be coupled to the double connector leaving one half blank.

All future supplies of these switches from the Spares Division will be of the modified type.
