BULLETIN T-67-8  
(Re-issue of T-64-19)

SUBJECT: SPITFIRE HARDTOP SEALING

DATE: FEBRUARY 2, 1967

---

When fitting a hardtop to the Spitfire it is essential that an enlarged sealing rubber, part numbers 616428 and 616429, is fitted in the cant rail to ensure adequate sealing between drop glass and hardtop.

To permit a common condition to suit either hard or soft top, the height of the droplight must be adjusted to 12 3/4" from the top edge of the door frame.

To position the glass to the above dimension, a special large glass stop nut 1/4" UNF x 3/8" AF x 1/2' thick, part number 616506, may be used on the regulator in place of the 1/4" UNF jam nut.
